

SMD RGB vs. DIP RGB LED

SMD = 1 RGB LED

DIP = 1R 1G 1B
(3 LEDs)

SMD Viewing Angle
140°v by 140°h
*Available in outdoor
6mm, 8mm, 10mm,
12mm and 16mm*

Our K8 and K5 SMDs are all:

- 281 Trillion Colors
- IP65 & IP43 Rated
- ETL Certified
- Dark Sky & FCC Compliant

DIP Viewing Angle
120°v by 60°h
*We do not provide DIPs any
longer in our Full Color LED
Displays*

SMD's RGB are more outstanding due to their:

- Better Viewing Angle
- Light weight
- Crisper, truer and more vibrant colors
- Newer Better Technology

This lends itself to SMD's having a much more natural look and feel of an image, and more legible text on your LED Display – SMD's are less pixilated.

***Not only Beautiful ~
But Energy Efficient too!***

Save 15% in Energy

& Dark Sky Compliant

All K8 outdoor SMDs RGB (Full Color) come with our Dual:

- 8 Year Parts Warranty AND
- 8 Year Quality Warranty

*On all K8 Line SMD 6mm, 8mm, 10mm, 12mm, and 16mm
Full Color LED Displays.*
